To whom it may concern,

Christchurch Junior Cricket Association (CJCA) has been using the SportCheck text messaging system for 3 seasons now. This system has provided a very cost effective means of communicating to our members when there are cancellations and other last minute notifications to be made.

The system is easy to use and administer, allowing the Association the ability to distribute instant messages to a large number of members. Last season there were over 680 members from cricket clubs and schools who registered to receive text messages.

During the most recent season, there were several wet days where a text message was distributed to members in the Junior and Senior division separately, to advise of ground closures and alternative grounds where cricket was to be played. This indicates the flexibility to provide information not only for cancellations, but also for other urgent or relevant information.

With parents and players who are often very busy on Saturdays with other sports, the ease of receiving a text message if Cricket is cancelled, is proving to be invaluable. The service literally saves people time and money.

I recommend other sports clubs and organizations register with SportCheck as it is well worth it. It provides a very valuable service for your members, and is the most efficient and reliable way to get relevant information instantly to your members wherever they might be.

Kind Regards,

Barry Hazeldine
CJCA Manager
Christchurch Junior Cricket Association
